Veterinary Endoscopy

Training

Dr. Randy Hutchison, DVM
Northern Ohio Veterinary Endoscopic Services

Endoscopic Training

Dr. Randy Hutchison offers personalized rigid and flexible endoscopic training at your practice to train you and your staff on proper endoscopic techniques. The goal of the training is to educate all of your staff - minimizing the learning curve and expediting the successful incorporation of endoscopy in your practice.

Training in your own practice allows you to become comfortable performing the procedures in the setting you'll operate in. Simultaneously your support staff will be trained to assist you in surgery and reduce the turn around time between cases.

Training also includes information on how to successfully market endoscopic procedures to your clients. Dr. Hutchison guides you and your administrative staff on how to introduce the new procedures, helping grow your client base and increase practice revenue - *the introduction of endoscopic alternatives should occur during the very first wellness exam.*

Training on the following procedures is available:

- Cystoscopy
- Gastroscopy
- Laparoscopy
- Laparoscopic Spays
- Rhinoscopy
- Thoracoscopy

Endoscopy will generate new clients and new revenue in all areas of your practice

Dr. Hutchison also conducts quarterly Laparoscopic Spay training course at his practice. The skills and techniques learned for laparoscopic ovariectomies provide the basic fundamentals for many endoscopic procedures.
